Alexandria, VA 22313-1450

**INFORMATION DISCLOSURE STATEMENT UNDER 37 CFR 1.97(b),
AND EXPLANATION OF THE RELEVANCE OF THE CITED PRIOR ART**

Sir:

The undersigned hereby requests that the prior art cited on the attached prior art statement be placed of record in the application file and be considered by the examiner.

This citation of prior art is made under 37 CFR 1.97(b), since it is being filed within three months of the filing date and before the mailing of a first Office Action.

The relevance of the prior art cited on the attached form PTO/SB/08a is as follows:

DE 199 28 913 A1

The invention relates to a piston pump for a vehicle brake system, in particular, for a slip-controlled hydraulic system. In order to dampen pressure pulsations, the invention provides a throttle valve which serves as a point of narrowed cross-section in an outlet channel of the piston pump.

DE 102 29 201 A1

This patent shows a piston pump which includes a displaceable piston and a compression chamber which widens out during the piston suction stroke and narrows down during the piston pressure stroke. A pressure chamber is set downstream behind the outlet valve. The pressure chamber is defined by a pliable wall which has an elastically resilient membrane mounted in an elastically yielding body. Both the pressure chamber and the pliable wall are mounted in the region of the outlet valve.

Examination of this application is respectfully requested.

Respectfully submitted,

Ronald E. Greigg
